

REMARKS

By this Preliminary Amendment, a cross-reference to related applications and section headings are being added to the specification. The claims and the Abstract are being amended to conform with U.S. practice. More specifically, reference numbers are being deleted from the claims, "wherein" is being substituted for the European introductory phrase "characterized in that" and the claims otherwise modified to ensure clear antecedent basis. The substance of these claims remains the same. New claims 9 and 10 are being added. The addition of "new matter" has been scrupulously avoided. Claims 1-10 remain in this case.

Favorable consideration of this application, as amended, is respectfully requested.

Respectfully submitted,

Jeff Rothenberg, Reg. No. 26,429
